Hadh Kar Di Aapne is a 2000 Indian Hindi comedy film. It stars Govinda and Rani Mukerji in the lead roles. The film was directed and produced by Vijay Krishna Acharya. Download hindi film Hadh Kar Di Aapne full movie online free vip. Hadh Kar Di Aapne Hindi Hindi Full Movie Govinda Rani Mukerji Johnny Lever With Eng Subtitles Mp3 320 x 240 60kb avi Free Download Full Movie - Youtube To Mp3. Q: Why does ClampToEdge not work on a GLSL normal matrix? var normalMatrix = mat4.create(); normalMatrix.mul(mat4.create()); normalMatrix.translate(offset); normalMatrix.translate(-offset); gl.glUniformMatrix4fv(uniforms.normalMatrixUniform, 1, false, normalMatrix.f); Normal matrix is multiplied by itself, so clamps only work the first time, and then I get an error from WebGL: INVALID\_VALUE is never generated by WebGL The code works as expected if i don't use glUniformMatrix4fv. A: The correct answer, apparently, is that WebGL takes old, poorly behaved OpenGL "conventional matrix stuff", and from the context of a normal vector, it is the result of a cross product with the z axis (0, 0, 1) for one of the matrices. Q: Why is  $\int_{-\infty}^{\infty} \frac{e^{-x^2}}{x+a} dx = e^{-a^2} + C$ ? Why is  $\int_{-\infty}^{\infty} \frac{e^{-x^2}}{x+a} dx = e^{-a^2} + C$ ? I was told by my lecturer to show this. I am not a calculus student but a physics one, so I am not sure about the notation used here. A: Note that  $\frac{e^{-x^2}}{x+a} = \int_a^x e^{-t^2} dt + e^{-x^2}$ , and then  $\int_{-\infty}^{\infty} \frac{e^{-x^2}}{x+a} dx = \int_a^x e^{-t^2} dt + \int_{-\infty}^{\infty} e^{-x^2} dx$ .
